- Baron Bloodmore and the Crimson Castle is a video slot with 5 reels and 25 pay lines. The game features a Massive Mystery symbol, a Bonus game with free spins, and a Crimson Cash Bonus game with a pattern collect feature, a spawn feature and a copy feature. The theoretical return to player is 89.94%.
- A game round is started with the action button and plays the game with the selected bet level.
- No bets can be altered during a game round.
- Auto play plays the game automatically for the number of game rounds selected in the auto play page. This feature may not be available.
- All game pay-outs and win combinations are paid out according to the pay table.
- All pay line wins during a game round are added and presented at the end of the game round.
- All wins are presented and paid out in the selected currency.
- Only the highest win per payline is paid out, if in sequence from leftmost to right with no gaps and in combinations according to the payable.
- The Wild symbol substitutes for any other symbol except the Free spins Scatter symbol and the Cash Scatter symbol.
- The Massive Mystery symbol is a 3x3 symbol that randomly transforms into any other symbol except the Free spins Scatter symbol. In the Base game, the Massive Mystery symbol may randomly occur on any spin on reel 2-4. In the Free spins Bonus game, the Massive Mystery symbol is triggered in each spin.
- 3 (or more) Free spins Scatter symbols landing anywhere on the reels during the Base game trigger the Free spins Bonus game consisting of free spins. The number of free spins awarded depends on the number of Scatter symbols that triggered the Bonus game according to the pay table.
- 3 (or more) Cash Scatter symbols landing on 3 (or more) different reels during the Base game or the Free spins Bonus game trigger the Crimson Cash Bonus game. When the Crimson Cash Bonus game is triggered, the Cash Scatter symbols that triggered the Crimson Cash Bonus game will remain on the reels until the Crimson Cash Bonus game has ended or if the Pattern Collect feature is applied on the symbol(s).
- When the Crimson Cash Bonus game is triggered, the normal reels are replaced with special reels containing only symbols with bet multipliers (starting with a value between 1x and 50x bet), Crimson Cash Bonus game feature symbols, and empty spaces. The Crimson Cash Bonus game starts with 3 free spins. Every time a symbol lands on an empty space, the number of free spins is reset to 3. All symbols will remain on the reels for the remainder of the Crimson Cash Bonus game or if the Pattern Collect feature is applied on the symbol(s). At the end of the Crimson Cash Bonus game, the values of all bet multipliers are added together, and the total amount is paid out. When the Crimson Cash Bonus game is complete, the game continues from where it was triggered. Pay line wins do not apply in the Crimson Cash Bonus game.
- Pattern collect feature: When entering the Crimson Cash Bonus game, a pattern of 5 illuminated symbol positions is randomly generated. Every pattern generated will have the middle position illuminated, and at least one empty space. This pattern will be kept through the current Crimson Cash Bonus game until a new pattern is generated. When all illuminated symbol positions are filled, the Pattern collect feature is triggered. The bet multiplier values of the 5 illuminated symbols are added together. The total amount is added to the symbol in the middle position and then doubled. All affected symbols except the symbol in the middle position are then removed and a new pattern is generated.

- Spawn feature: In the Crimson Cash Bonus game, the Spawn symbol may randomly appear, adding its own bet multiplier value to all other existing bet multipliers on the reels. During any given spin, a maximum of one Spawn symbol may land on the reels.
- Copy feature: In the Crimson Cash Bonus game, the Copy symbol (which has no bet multiplier value of its own) may randomly appear, copying the values of all the other symbols on the reels to itself. During any given spin, a maximum of one Copy symbol may land on the reels. When the Copy symbol lands on the same spin as a Spawn symbol, it activates after the Spawn symbol has been activated.
- The maximum total bet multiplier for one game round is 25000. If this limit is reached the game round will be terminated and no additional wins will be paid out.
- The Bonus games are played with the same bet as the spin that triggered the Bonus games.
- In the event of game malfunction all affected bets and pays are rendered void.
- Maximum win
  - The maximum win of the game is 25000 times total bet.
  - The maximum win of the game is achieved by accumulating wins in a single game round until the total payout reaches 25000 times the total bet. No higher wins are possible.
  - The probability of hitting the maximum win is 1:4303775449.
  - No choices will affect the probability to get the maximum win.
  - The maximum win is the highest win observed in 421770000000 simulations of the game.
