Note: The Baron Bloodmore and the Crimson Castle game is referred to as Baron Bloodmore and the Crimson Castle, The Game or Game.

- Baron Bloodmore and the Crimson Castle is a game with 5 reels and 25 lines. The game features a Massive Mystery symbol, a Bonus game with free spins, and a Crimson Cash Bonus game with a pattern collect feature, a spawn feature and a copy feature. The theoretical return to player is 89.94%.
- A game round is started with the action button and plays the game with the selected play level.
- No play levels can be altered during a game round.
- Auto play plays the game automatically for the number of game rounds selected in the auto play page. This feature may not be available.
- All game win amounts and win combinations are awarded according to the win table.
- All line wins during a game round are added and presented at the end of the game round.
- All wins are presented and awarded in the selected coin types.
- Only the highest win per line is awarded, if in sequence from leftmost to right with no gaps and in combinations according to the win table.
- The Wild symbol substitutes for any other symbol except the Free spins Scatter symbol and the Cash Scatter symbol.
- The Massive Mystery symbol is a 3x3 symbol that randomly transforms into any other symbol except the Free spins Scatter symbol. In the Base game, the Massive Mystery symbol may randomly occur on any spin on reel 2-4. In the Free spins Bonus game, the Massive Mystery symbol is triggered in each spin.
- 3 (or more) Free spins Scatter symbols landing anywhere on the reels during the Base game trigger the Free spins Bonus game consisting of free spins. The number of free spins awarded depends on the number of Scatter symbols that triggered the Bonus game according to the win table.
- 3 (or more) Cash Scatter symbols landing on 3 (or more) different reels during the Base game or the Free spins Bonus game trigger the Crimson Cash Bonus game. When the Crimson Cash Bonus game is triggered, the Cash Scatter symbols that triggered the Crimson Cash Bonus game will remain on the reels until the Crimson Cash Bonus game has ended or if the Pattern Collect feature is applied on the symbol(s).
- When the Crimson Cash Bonus game is triggered, the normal reels are replaced with special reels containing only symbols with play level multipliers (starting with a value between 1x and 50x play level), Crimson Cash Bonus game feature symbols, and empty spaces. The Crimson Cash Bonus game starts with 3 free spins. Every time a symbol lands on an empty space, the number of free spins is reset to 3. All symbols will remain on the reels for the remainder of the Crimson Cash Bonus game or if the Pattern Collect feature is applied on the symbol(s). At the end of the Crimson Cash Bonus game, the values of all play level multipliers are added together, and the total amount is awarded. When the Crimson Cash Bonus game is complete, the game continues from where it was triggered. Line wins do not apply in the Crimson Cash Bonus game.
- Pattern collect feature: When entering the Crimson Cash Bonus game, a pattern of 5 illuminated symbol positions is randomly generated. Every pattern generated will have the middle position illuminated, and at least one empty space. This pattern will be kept through the current Crimson Cash Bonus game until a new pattern is generated. When all illuminated symbol positions are filled, the Pattern collect feature is triggered. The play level multiplier values of the 5 illuminated symbols are added together. The total amount is added to the symbol in the middle position and then doubled. All

affected symbols except the symbol in the middle position are then removed and a new pattern is generated.

- Spawn feature: In the Crimson Cash Bonus game, the Spawn symbol may randomly appear, adding its own play level multiplier value to all other existing play level multipliers on the reels. During any given spin, a maximum of one Spawn symbol may land on the reels.
- Copy feature: In the Crimson Cash Bonus game, the Copy symbol (which has no play level multiplier value of its own) may randomly appear, copying the values of all the other symbols on the reels to itself. During any given spin, a maximum of one Copy symbol may land on the reels. When the Copy symbol lands on the same spin as a Spawn symbol, it activates after the Spawn symbol has been activated.
- The maximum total play level multiplier for one game round is 25000. If this limit is reached the game round will be terminated and no additional wins will be awarded.
- The Bonus games are played with the same play level as the spin that triggered the Bonus games.
- In the event of game malfunction all affected play amounts and wins are discharged.
- Maximum win
 - The maximum win of the game is 25000 times total play level.
 - The maximum win of the game is achieved by accumulating wins in a single game round until the total win amount reaches 25000 times the total play level. No higher wins are possible.
 - The probability of hitting the maximum win is 1:4303775449.
 - No choices will affect the probability to get the maximum win.
 - The maximum win is the highest win observed in 421770000000 simulations of the game.
