

Game Rules (9/5/2024)

Note: The Dionysus Golden Feast video slot is referred to as Dionysus Golden Feast, The Game or Game.

- Dionysus Golden Feast is a 3x5 video slot with 15 fixed pay lines. The game features Multiplier Wilds, Sticky Respins with a symbol upgrade feature and a Bonus Game with Free Spins and retrigger feature. The theoretical return to player is 96.16%.
- A game round is started with the action button and plays the game with the selected bet level.
- Auto play plays the game automatically for the number of game rounds selected in the auto play page. This feature may not be available in all markets.
- All game payout and win combinations are paid out according to the paytable.
- Only the longest win per payline is paid out, if in sequence from leftmost to right with no gaps and in combinations according to the paytable.
- The Wild symbols substitutes for all other symbols except the Scatter symbols. Any pay line including a wild symbol will have a multiplier based on the number of wilds included in the pay line. 1 wild symbol in a pay line grants 2x multiplier. 2 wild symbols in a pay line grants an 4x multiplier. 3 wild symbols in a pay line grants an 8x multiplier. 4 wild symbols in a pay line grants a 16x multiplier. 5 wild symbols in a pay line grants a 32x multiplier.
- The Golden Scatter symbol turns into a random sticky symbol (except Scatter and Wild symbols) and triggers the Sticky Respin feature. During the respin feature the sticky symbol locks into place and any identical symbols (or wilds) that match the sticky symbol will also lock into place and the rest of the symbols will respin. Whenever one or more Golden Scatters symbol lands in the game area, a random sticky symbol will be selected respectively and all current identical symbols (or wilds) that match the new sticky symbol(s) will also be locked into position. If there are more than one active sticky symbol in the game area, the most valuable symbol will be selected, and all current sticky symbols (except wilds) will be upgraded to that symbol. The Sticky Respin feature will continue until no more symbols become sticky or if all possible positions on the reels are locked. Paylines that consist only of symbols in locked positions will not be calculated in any win during the respin feature, instead they are calculated when the respin feature ends.
- When the Bonus meter is filled with 3 Scatter (silver or gold) symbols the Bonus Game is won or retriggered, awarding 8 or 4 free spins respectively. The Bonus meter is reset between each spin and each free spin.
- At the beginning of each free spin in the Bonus Game, a single Gold Scatter symbol is randomly placed in the game area and will trigger the Sticky Respin feature.
- The Bonus Game is played with the same bet as the spin that triggered the Bonus Game.
- No bets can be altered during a game round.
- In the event of game malfunction all affected bets and pays are rendered void.
- All wins during a game round are added and presented at the end of the game round.
- The maximum total bet multiplier for one game round is 7500x. If this limit is reached the game round will be terminated and no additional wins will be paid out.
- A feature buy option may be purchased at a cost that is a multiple of the current bet size. A purchase starts a spin with an outcome that triggers the Bonus Game. Theoretical RTP is 96.42%. All outcomes from a feature purchase pay according to the paytable and in relation to the bet size. The feature buy functionality may not be available in all markets.
