Note: King of the Party video slot is referred to as King of the Party, The Game or Game.

- King of the Party is a 5x6 video slot. The game features Scatter Pay win, Multiplier feature, Overlay Multiplier symbols and a Bonus Game with Exploding Wild symbol and retrigger. The theoretical return to player is 86.93%.
- A game round is started with the action button and plays the game with the selected bet level.
- Auto play plays the game automatically for the number of game rounds selected in the auto play page. This feature may not be available.
- All game payout and win combinations are paid out according to the payable.
- 8 or more identical symbols (except Scatters) anywhere in the game area will constitute a winning combination. The size of the win is dependent on the amount of winning symbols, according to the payable. All wins are multiplied by the current Multiplier below the reels. Winning symbols will be removed and trigger the Avalanche feature.
- The Avalanche feature is triggered when there is a winning symbol combination present. Winning symbols are removed and all empty positions on the game area will be replaced with new/or existing symbols from above. The Avalanche feature continues in the base game as new winning combinations appear, and in the Bonus Game as long as new winning combinations or if a Wild symbol explodes.
- Multiplier Feature: For each Avalanche feature, the Multiplier increases one level. Payouts for each spin are done prior to the Multiplier being upgraded. There is no upper limit to the multiplier. The Multiplier is reset at the end of each game round.
- Overlay Multiplier Symbols: Random symbols (except Scatters and Wilds) can have overlay multipliers. All Overlay Multipliers on winning symbols are accumulated and added to the Multiplier prior payouts.
- In the Base Game, three or more Scatter symbols trigger the Bonus Game consisting of Free Spins. In the Bonus Game, two or more Scatter symbols award an extra amount of Free Spins. The amount of awarded Free Spins depends on the number of scatters, according to the pay table. The Bonus Game starts with the Multiplier that was active when the Bonus Game was triggered.
 - In the Bonus Game, Wild symbols explode if not part of a winning combination, and all symbols (except Scatters) on the same row and reel as the Wild symbol are removed, thus triggering a new Avalanche. If any Overlay Multiplier symbol is removed by the explosion, its multiplier is added to the Multiplier.
- No bets can be altered during a game round.
- In the event of game malfunction all affected bets and pays are rendered void.
- All wins during a game round are added and presented at the end of the game round.
- The maximum total bet multiplier for one game round is 5000. If this limit is reached the game round will be terminated and no additional wins will be paid out.
- Maximum win
 - The maximum win of the game is 5000 times total bet.
 - The maximum win of the game is achieved by accumulating wins in a single game round until the total payout reaches 5000 times the total bet. No higher wins are possible.

- The probability of hitting the maximum win is 1:190037150.
- No choices will affect the probability to get the maximum win.
- The maximum win is the highest win observed in 255790000000 simulations of the game.
